

Cyberlitica will custom design your cyber campaigns to simulate a real-world phishing scam(s). A selected email is sent to all (or a specific subset) of a company's employees, enabling the company to see which employees and what percent of them would have fallen prey, had the simulation been authentic. Cyberlitica's fully managed, easy to use program combines training and reinforcement via simulated phishing assessments. Our goal is to measure and improve employee cybersecurity behavior. Our security awareness program services provide proven results without additional IT or HR resources. Fast, Flexible, Easy to Use, and Cost-effective, with per-user pricing to fit every budget, our phishing application successfully and effortlessly manages your company's security awareness campaigns with maximum impact.

Cybersecurity Training Portal with Interactive Videos & Quizzes We offer a fully hosted ready-to-launch, branded cybersecurity portal with your company logo. Included are interactive training courses, quizzes, and (once training is completed) certificates of completion. Our tool is mobile, friendly, and easy to use.

Compliance & Reporting - Numerous reports including sent, progress made, click-throughs, training is taken, and scored. Reporting meets compliance requirements for SOX/SEC/FINRA/PCI/HIPAA and others.

Onsite Cyber Training for Employees, Executives, Human Resources, and Board of Directors. Our Best-in-Class dedicated consultants are available to train your staff in numerous cyber-related subjects. Training is available onsite or using online tools.

Cyber Regulatory Compliance Services Cyberlitica is now providing businesses with all the tools and services necessary for business compliance with Local, State, Federal, and Professional Association Cyber Regulations. At least 47 states and Puerto Rico introduced resolutions dealing significantly with cybersecurity. Thirty-one states enacted cybersecurity-related legislation. These laws are not State specific. <https://www.cyberlitica.com/compliance>
